

Sustainability Report 2021

GRI Content Index

GRI Content Index

Disclosure Number/Description	Sustainability Report Page/ Online reference	Supplementary comment
General Disclosures		
Organisation Profile		
102-1: Name of the organization		The Vita Group
102-2: Activities, brands, products, and services	Pages 1, 6-7, 16-17, 21	
102-3: Location of headquarters		Oldham Road, Middleton, Manchester M24 2DB
102-4: Location of operations	Page 45	Significant operations in England, France, Germany, Italy, Hungary, Lithuania, Holland, Poland, Albania, Bulgaria, Serbia, Croatia, Slovakia, Romania.
102-5: Ownership and legal form	Page 47	Owned by SVP Global.
102-6: Markets served	Pages 1, 7, 47	Products and services are offered globally. We work across a number of sectors, divided into 3 divisions Comfort, Technical and Flooring. Within these sectors we service a number of industries and our foam is used for a number of applications. Comfort predominantly work with bedding and sofas, mattresses being the largest application, we also within Comfort work within the following markets: Consumer, Liquid Compounding, Mobile Homes and Marine, Medical, packaging, Sports and Leisure. Within Technical we work across the following sectors: Industrial, Automotive, Rail, Aviation, Medical, Building and Construction and Consumer. Flooring produce for the following applications: Shockpad, Rubber Underlay, Underlay for wood and Carpet Underlay. In terms of customers and beneficiaries we operate mainly as a B2B business. However specifically in the Bed in a Box market we work with clients to convert, pack and drop ship completed mattresses directly to the consumers.
102-7: Scale of the organization	Pages 14, 22, 45	Total number of employees: ~3,200; with 40 main sites under our control and net sales (for private sector organizations) of approximately €1 billion. Total capitalisation (for private sector organizations) broken down in terms of debt and equity is not publically available from The Vita Group. Quantity of products or services: exact numbers are not meaningful owing to the vast number of items of varying shapes and sizes, and modular configuration.
102-8: Information on employees and other workers		1,658.83 and 537.3 full-time equivalent (FTE) men and women (respectively). No significant numbers of temporary or seasonal workers are employed at any site. Current data are not available by region or employment contract type. We anticipate evolving our reporting to enable future disclosures on these within three years.
102-9: Supply chain	Pages 14, 17-18, 20, 22, 26-27, 35	Our supply chains are global. Polyurethane chemicals are sourced mainly from Europe, but also from the US and Asia. In terms of risk exposure our toluene diisocyanate (TDI) is sourced with due regard for the requirements of REACH legislation. A very small amount (0.08%) of our raw materials contain tin, all relevant suppliers complete the Conflict Minerals Reporting Template (CMRT) to share information through the supply chain regarding mineral country of origin and the smelters and refiners being used.
102-10: Significant changes to the organization and its supply chain		No significant changes in 2021.
102-11: Precautionary Principle or approach		Our first sustainability initiative was in 1970, as page 5 shows, over the following 50 years we constantly seek to monitor environmental performance and apply the precautionary principle in production methods and product design.
102-12: External initiatives	Pages 5, 11, 26, 39, 51	
102-13: Membership of associations	Pages 3, 5, 11, 23, 26, 35	
Strategy		
102-14: Statement from senior decision-maker	Pages 2-3	
Ethics and integrity		
102-16: Values, principles, standards, and norms of behavior	Page 6	
Governance		
102-18: Governance structure	Pages 8, 47	
Stakeholder engagement		
102-40: List of stakeholder groups	Page 49	Stakeholders with whom we engage in our business and other commercial relationships: investors, suppliers, contractors, customers, employees, industry bodies, regulators, local community groups, visitors to sites.
102-41: Collective bargaining agreements	Page 41	All employees are covered by collective bargaining agreements.
102-42: Identifying and selecting stakeholders		Our vision and strategy 'Enhancing Everyday Life' was developed using interactions and engagement with a variety of stakeholders including investors, customers, industry bodies, and employees (mainly senior management). This process is the basis for the identification and selection of stakeholders with whom we engage in our delivery of the strategy, and informed the materiality assessment in 2021, for example.
102-43: Approach to stakeholder engagement	Pages 9, 23, 26-27, 41, 47, 50, 52	Sustainability Policy (www.thevitagroup.com/legal-csr/)
102-44: Key topics and concerns raised	Pages 50, 52	Sustainability Policy (www.thevitagroup.com/legal-csr/)
Reporting practice		
102-45: Entities included in the consolidated financial statements	Page 49	All Vita Group assets are in scope of the report.
102-46: Defining report content and topic Boundaries	Page 50

Employment (2016)		
103-1: Explanation of the material topic and its Boundary	Pages 9, 37, 50, 52	
103-2: The management approach and its components	Pages 9-10, 37, 40, 42, 47, 49	
103-3: Evaluation of the management approach	Pages 37, 47, 49	
401-1: New employee hires and employee turnover	Page 40	In 2021, there were 851 voluntary leavers and an attrition rate of 15.5% across the Group. The information required by GRI cannot be disclosed in its entirety because the data are not available, we anticipate resolving this in the next two years.
401-2: Benefits provided to full-time employees that are not provided to temporary or part-time employees	Page 31,41	As a Europe wide employer, benefits vary by country. Examples of some benefits in place include parental leave, vouchers, discounts etc.
Occupational Health and Safety (2018)		
103-1: Explanation of the material topic and its Boundary	Pages 37-38	Our Group Safety, Health and Environment (SHE) policy aims to deliver zero harm for all employees, contractors and visitors on our sites.
103-2: The management approach and its components	Pages 38-39, 42, 47 https://www.thevitagroup.com/ wp-content/uploads/2021/03/ Vita-Sustainability-Policy.pdf https://www.thevitagroup.com/ wp-content/uploads/2020/07/ Supply-Chain-Responsibility- Policy_EN_Oct-2019.pdf	Our Group Safety, Health and Environment (SHE) policy (and other internal SHE policies and Mandatory Standards available our intranet) aims to deliver zero harm for all employees, contractors and visitors on our sites. Vita Group Safety, Heath & Environment (SHE) leadership team advises on SHE risk reduction and attrategy, and supports the business in its execution and auditing. The Board establishes levels of acceptable risk and makes capital and other resources available as required. The senior management team sets Vita's safety performance goals and allocates capital and resource. The Group Safety Council sets overall SHE strategy including policy, standards, behavioural/culture change activities. Divisional SHE Councils adopt group strategy accounting for divisional priorities and responsibilities. Regiona directors and site managers implement site-specific safety management in line with group SHE management system policy, site-level procedures and checklists, and other 'zero harm' initiatives. Council meetings are monthly.
103-3: Evaluation of the management approach	Page 38	Our Policy is to monitor and periodically review SHE risk management performance to ensure continual improvement. This will be done through monitoring of leading and lagging safety indicators and through site audits.
403-1: Occupational health and safety management system	Page 37	Each Vita Group business has a formal written SHE management system in place that details compliance with legislation where we operate, with policy, and with Group Mandatory Standards. The safety management system follows the plan-do-check-act (PDCA) cycle whereas Vita Towards Zero (VTZ) is our behavioural safety programme and engagement campaign to help deliver the Group's safety priorities, enable visual safety leadership, and set the tone and culture. Our safety management system aligns with recognised standards such as ISO18000 and the DuPont Bradley Curve, a measure of maturity for behavioural safety. Our Policy ensures clarity of responsibilities, including the appointment of a SHE Coordinator for each site.
403-2: Hazard identification, risk assessment, and incident investigation	Pages 38-39	Each site management system includes the identification and evaluation of significant risks to people and the environment from work activities, and the formulation of appropriate risk controls and safe operating procedures, and planning of risk management/risk reduction activities and the implementation of policies, practices and guidance with clear objectives for risk reduction and performance indicators for improving the management of risk. We build safety in at each level of equipment and process design, eliminate hazards where possible, and control hazards carefully where it is not possible. The Group and Divisional Safety Councils regularly review key risks (e.g. site specific risks, audit actions at high-risk sites, high-level Group-wide risk) and the "health" of the management system itself, ensuring the correct balance of "top-down" and "bottom-up" activities on sites. Hazard identification reports (compiled by an external specialist) were reviewed in our September 2021 Council meeting. Action taken included a session at a site where the VTZ programme is working exceptionally well, followed by plans for leveraging the site's experience at other sites. Other actions included high-level accident and investigation training and the introduction of a new data-driven add-on to our safety system.
404-3: Occupational health services	Page 38	Group SHE activities include safety and wellbeing initiatives. See 403-2 for additional information, above.
403-4: Worker participation, consultation, and communication on occupational health and safety	Pages 38-39, 41-42	Our Policy is to have an appropriate employee safety committee at each site, for instance a Vita Towards Zero Committee. Our safety strategy, governance and VTZ programme rely on human involvement: behavioural safety embedded with a strong safety culture reducing "unforced errors" and unsafe behaviour. Note leading and lagging KPIs are in place, and responsibility for delivery is delegated to appropriate levels.
403-5: Worker training on occupational health and safety	Pages 39, 42	Everyone who works at the Vita Group is given appropriate information, instruction and training so that they are able to protect themselves, other people and the environment whilst at work.
403-6: Promotion of worker health	Pages 38-39, 41	
403-7: Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	Pages 38-39, 41-42	Our Policy insists that each Vita business will actively drive improvements in SHE with leading indicators such as near misses, hazard identification, hazard closure and standard operating procedure reviews. All accidents or environment incidents must be reported in the Group's SHE incident reporting system. Accidents must be investigated in accordance with their severity and remedial actions taken to prevent reoccurence.

403-8: Workers covered by an occupational health and safety management system	Page 38	All Vita sites are required to have a safety management system in place, which is in line with the requirements of ISO45001 (note: Vita does not seek formal certification). The safety management system applies to all visitors, contracters and employees. Our 'Vita Towards Zero' safety programme covers all employees and any other workers under our control, is governed by our General Safety Council, and an audit sub-committee which oversees internal control; no external audit is used. All (100%) employees are covered by the system, an equivalent 20% of the company has been formally audited.
403-9: Work-related injuries	Pages 37-38	For 2021, no fatalities occurred in our operations. Employees: we recorded 20 work-related injuries (5,103,888 working hours). Temporary employees are included in our safety data and reporting. Contractors: we recorded one incident but we do not record hours worked, contractor safety rates are not calculated because we do not collect the data on a formal basis. For hazardous risk and elimination procedures, see 403-2 above.
